## How to charge speaker

Please turn the speaker off and charge it timely when it is in low battery with voice prompts "Low battery, please charge".

The red indicator light is always on when charging, and the red indicator light is off when fully charged.

Please note:

**Please note:**

1. Use the included DC 5V power adapter to charge the speaker internal rechargeable battery.
2. Plug adapter into 110~240 AC outlet. Connect the cable end into the DC 5V power input on speaker.
3. It will normally take 3–5 hours to fully charge the battery.
4. When charging is required, a voice prompt will indicate, " Low battery, please charge ", the battery indicator will blink while charging. It will stop blinking when battery is fully charged.
5. Recharge the battery within 48 hours of " low battery " voice prompt. In order to extend the life of the internal battery, please charge it regularly even if system is not being used.
6. It is suggested that you charge the internal battery an additional 1–2 hours after fully charged to extend its life.
7. Please DO NOT over charge the battery by leaving the system plugged in continuously. This will reduce the life of the internal rechargeable battery and could cause over heating.
